Episodes of Care with OakLeaf

— BUNDLED SERVICES —

The OakLeaf Medical Network was founded on the premise of making personalized, high-quality health care an experience available to patients in their community, not miles away. As a network of independent clinics, and business owners, we understand our opportunity to collaborate with local employers and the community to build success stories together. Together we can impact change.

What is an Episode of Care?

An episode of care is a packaged set of health care services bundled together for a single price and provided to a patient across a defined period of time.

OUR FOCUS IS ON PRODUCING MEANINGFUL OUTCOMES FOR A FAIR PRICE
AND NEVER COMPROMISING ON PATIENT EXPERIENCE.
