

# Four Core Drivers of High-Value Health Care

## TRANSPARENCY

You can't manage what you can't measure. The Alliance is working to provide accurate, easy-to-access information comparing cost and quality from different providers so providers can be chosen that deliver good results at lower prices.

## PAYMENT REFORM

The way health care is paid for influences the behavior of clinicians and hospitals. That is why The Alliance is continuing to refine payment methodology to reward cost effective, high-quality care rather than volume of services.

## BENEFIT PLAN DESIGN

Employers can add incentives to their benefit plans encouraging employee use of certain doctors and hospitals - not to limit employee choice but to choose those that deliver the best care at the lowest cost. **And when enough employers get involved and provide these kind of incentives, physicians will be motivated to improve the value of their care.**

## PROVIDER NETWORK DESIGN

The Alliance contracts directly with providers on employer's behalf to ensure convenient access to care for employees while encouraging competition on price and quality. Our provider network is continually expanding based on the needs of current and prospective cooperative members, giving employees more high-value care options.
