

# DATA-DRIVEN PHARMACY BENEFITS

National Cooperative 

Data plays an important role in providing exceptional pharmacy benefits. Access to and the analysis of data drives best-in-class plan design and greater savings for plans and plan participants. Work with your pharmacy benefit manager (PBM) to regularly review data or find a strategic partner who uses data with your plan's best interest in mind.

## National CooperativeRx uses data to provide our members:

**PBM RFPs and  
Market Checks**

If not reviewed and updated annually, PBM contracts quickly become outdated. National CooperativeRx uses data and industry knowledge to maximize savings for members through annual contract and pricing updates.

**Drug Spend Reports**

Plan sponsors should regularly review plan performance. National CooperativeRx provides regular reporting and uses data to recommend best-in-class plan designs to drive higher-value care.

**Clinical Oversight**

The complex nature of the pharmacy benefit leaves it vulnerable to fraud, waste, and abuse. The National CooperativeRx clinical team uses data to prevent bad actors from taking advantage of plans and plan participants.

**Audits**

Confirming intended plan set-up, contractual guarantees, and the accuracy of rebate payments are some of the essential audits plans receive through National CooperativeRx. We work to correct any errors and provide 100% return of recoveries to members.

# Dental + Vision Insurance

Two benefits. Zero headaches.

We make offering dental and vision insurance hassle-free by providing you with a dedicated account manager and combined benefits administration. Give your employees better health with the coverage they deserve. Get two great plans from one name you trust. **Learn more at [deltadentalwi.com](http://deltadentalwi.com).**
